PROFESSIONAL EXPERIENCE

Amazon – Business Intelligence Engineer

Jul 2025 – Present

Finance · Amazon Leo / Project Kuiper (Satellite Broadband)

Seattle, WA

- Sole technical owner for a ~130-person finance organization: designed, built, and operate a production financial-operations web platform (Python/Flask) unifying eight domains — variance commentary with AI-assisted review, live P&L and capital-expenditure analytics, an AI knowledge assistant, a resource library, planning dashboards, and reporting.
- Built and launched an AI-powered financial knowledge assistant using retrieval-augmented generation over hundreds of curated documents, with automatic source citation and export-control screening; adopted org-wide and accessible in-app, via a hosted agent, and inside analysts' local AI tools.
- Co-created and led the pre-launch quality audit of a reusable AI skill library now used across the broader finance organization to standardize and accelerate analysts' AI workflows; finalist among a 600-person internal hackathon.
- Replaced a manual spreadsheet process with an interactive general-ledger analytics dashboard offering transaction-level drill-down across seven dimensions to support month-end close and purchase-order controllership.
- Serve as the primary technical advisor bridging finance teams and adjacent engineering, data, and platform organizations; established and lead a monthly Analytics & AI forum and enablement sessions driving AI adoption across the org.

Amazon – Business Intelligence Engineer

Mar 2022 – Jul 2025

Compensation · People Experience & Technology (PXT)

Seattle, WA

- Designed a company-wide compensation range review tool; a heavily utilized dashboard built through weekly managed workgroup sessions, user-acceptance testing, and launch demos.
- Created compensation cost modelers to simulate the implications of potential policy changes — highly customizable scenario builders enabling quick, flexible modeling of proposed changes.
- Led implementation of a machine-learning-powered natural-language querying tool across an organization of 100+ users, improving speed to insight and reducing strain on BI resources; on a team of 3, maintained a dashboard suite with 5k+ monthly accesses across 600+ users.
- Developed dynamic, finely grained data security for 10k+ managers and built and maintained ETL pipelines on a Redshift data warehouse (SQL, refresh scheduling, dependency management, data-quality inspection).

PAC Worldwide

Oct 2017 – Feb 2022

Business Intelligence Developer (Apr 2020 – Feb 2022) · FP&A Manager (Oct 2017 – Apr 2020)

Redmond, WA

- Created, managed, and scaled the data warehouse (pipeline development, data cleansing, incremental loads, execution scheduling, security, and error handling) and built primary financial reporting using Power BI, Jet Reports, and Excel/VBA with the CFO and business-unit stakeholders.
- Migrated data between ERP systems for multiple go-lives; built automated, scalable ETL processes to transfer financial data (general and sub-ledgers) between ERP environments.
- Developed a cross-department budgeting system feeding a consolidated set of financials, and aided sales forecasting with BI solutions based on a machine-learning sales algorithm.

Falck USA – Financial Analyst

Bothell, WA | Aug 2015 – Sep 2017

Inspired LED – Controller

Tempe, AZ | May 2013 – Jul 2015

Ernst & Young – Assurance Intern

Seattle, WA | Jun – Aug 2014

EDUCATION

University of Washington

Seattle, WA

Foundations of Programming (Python) · Certificate in Business Intelligence: Building the Data Warehouse

Arizona State University – W. P. Carey School of Business

Tempe, AZ

Bachelor of Science, Accountancy

CERTIFICATIONS

AWS Certified Cloud Practitioner (Oct 2024) · Microsoft Certified: Data Analyst Associate (Apr 2021) · Microsoft Power Platform Fundamentals (Nov 2021)

SKILLS & INTERESTS

Technical: SQL, AWS, QuickSight, Power BI, Data Warehousing, ETL, Python, Flask, Git, AI/LLM application development, Retrieval-Augmented Generation (RAG), AWS Bedrock, prompt engineering, Microsoft Dynamics (NAV, F&O), Microsoft SQL Data Tools, Advanced Excel, VBA Macros, Jet Data Manager / Reports, DOMO

Interests: Fantasy / Sci-Fi Books, Hiking, Gaming, Paddle Boarding, Traveling, Gardening
